

# AI Prompts to Help Build a Great Candidate Journey

1

## Getting Started:

“Describe an empathy map, and itemize the steps to develop an empathy map”

“Incorporate generally accepted steps in the end-to-end recruitment process in the stages of an experience map”

“Provide me with a script to compel my boss to let me invest in design thinking as a problem-solving strategy”

2

## Building your Personas:

“I am a talent acquisition leader, what types of candidate personas should I be thinking about?”

“I am creating a persona for type of candidate who might apply to my company. What are the qualities of this candidate persona?”

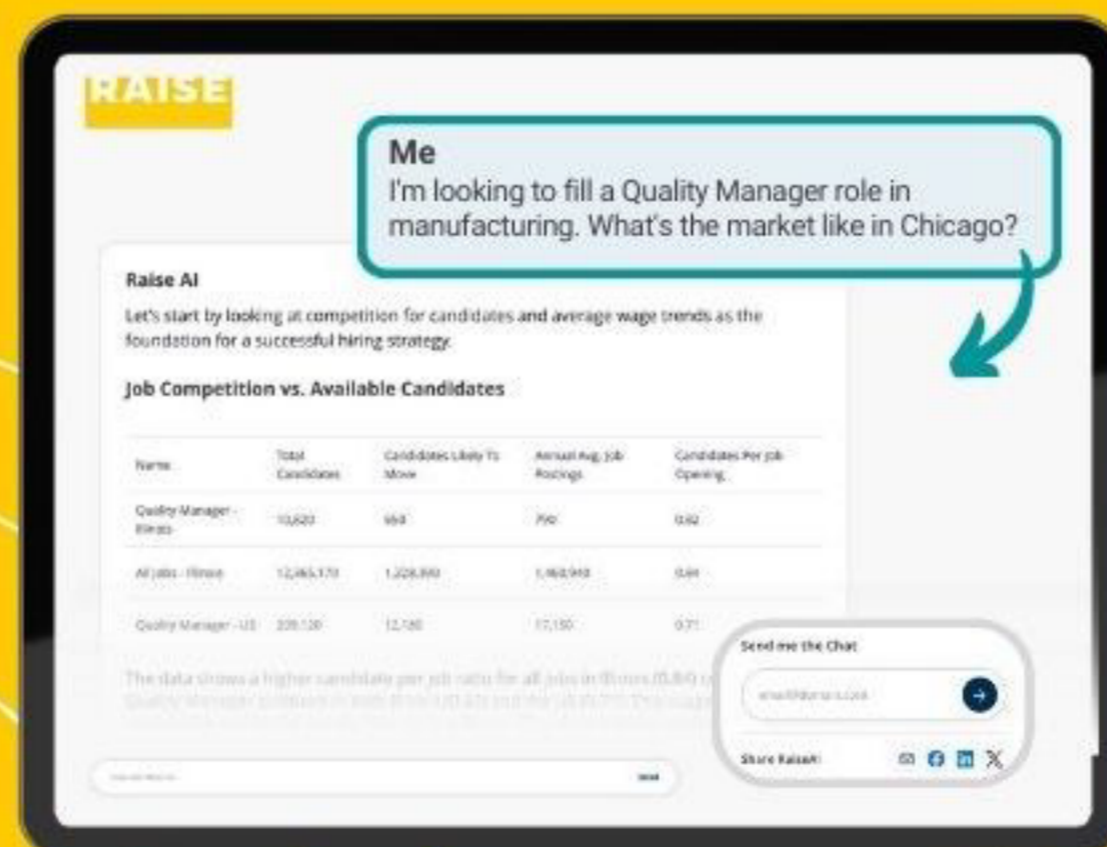

3

## What to Measure:

“What recruitment data points can I impact through empathy mapping?”

“I am a talent acquisition leader, how do I translate those metrics into dollars?”
